GAME1003
This course provides an introduction to electronic game development and game development careers. It includes an examination of the history and philosophy of games, the game production process, employee factors for success in the field, and current issues and practices in the game development industry. End of course outcomes include:
• Describe the history and evolution of video and computer games and game genres.
• Identify the phases and processes involved in developing a computer game.
• Design a simple computer game from initial concept to final design document.
• Describe current trends in the game industry with regards to hiring practices, working conditions, etc.
